What will change in Portugal 2030?

Helena Azevedo

SUSTENTÁVEL
2030 PROGRAMA AÇÃO CLIMÁTICA
E SUSTENTABILIDADE

MTR – Impact of the New Priorities on the Sustentável 2030 Programme

Priority 2F: secure access to water, sustainable water management, including integrated water management, and water resilience

Areas of Intervention

Financial Allocation

**€344.7
million**

Upstream urban water cycle

(eligibility transferred from
the Regional Programmes
from 1 January 2026)

Water Resilience

(3 projects transferred
from the RRP)

MTR – Impact of the New Priorities on the Sustentável 2030 Programme

➤ Upstream urban water cycle investments – WS and WW

- Compliance with environmental regulations — 'resolution of environmental liabilities' (WW)
- Interconnections between upstream water supply systems to ensure resilience in situations of water scarcity (WS)
- Replacement/reinforcement of water sources and resolution of water quality issues with an impact on public health (WS)
- Reduction of undue inflows into wastewater and stormwater systems, including the construction of stormwater infrastructure
- Production of Water for Reuse (WfR)
- Own energy production for self-consumption and energy efficiency, as well as the recovery of by-products from the production process, such as sludge recovery

MTR – Impact of the New Priorities on the Sustentável 2030 Programme

**Water Resilience in the Territories Most Vulnerable to Drought -
Algarve and Alto Alentejo (*)**

**Algarve Desalination
Plant**

**Water intake at
Pomarão**

**Pisão Dam and
connection to the
Póvoas Meadas Water
Treatment Plant (WTP)**

(*) Financing limited to 40% of the priority allocation (40% of €344.7 million = €137.8 million)

MTR – Strengthening Support for Water under Portugal 2030

Sustentável 2030

€344.7 million

(new eligibility)

Regional Programmes

Reinforcement of **€159 million** for investment in the downstream urban water cycle, with a focus on system efficiency, namely the reduction of water losses

Additional total of **€503.7 million** to strengthen support for water - 'new water'

which is in addition to the initial amounts programmed under the Regional Programmes, amounting to approximately **€665 million** - 'old water'
